

# DUBLINO antr + MTP 3 antr + SIRETEX

## TECHNICAL LININGS

Waterproof and breathable

### Construction:

|          |                         |                  |
|----------|-------------------------|------------------|
| TEXTILE  | 1.layer: DUBLINO        | 85% PA - 15% PES |
|          | 2.layer: MTP D/20       | 100% PU          |
| MEMBRANE | 3.layer: MEMBRANE       | 100% PES         |
|          | 4.layer: MAGLINO TRICOT | 100% PA          |

### Physical Characteristics:

|        |                    |
|--------|--------------------|
| WIDTH  | 150 cm (+/- 3%)    |
| WEIGHT | 230 gr/mq (+/- 5%) |

### Technical trials:

|                                                            |                     |
|------------------------------------------------------------|---------------------|
| Abrasion resistance martindale (EN ISO 20345) wet (cycles) | > 50.000            |
| Abrasion resistance martindale (EN ISO 20345) dry (cycles) | >100.000            |
| Water vapour coef cient (EN ISO 20344)                     | 20,3 mg/cm2         |
| Water vapour permeability (EN ISO 20344)                   | 2,3 mg/cm2h         |
| Resistance against water penetration                       | >10 mt water column |

The stated data come from analysis done in inner laboratory, for this reason they do have indicative value.
